Name: Bethany Wong (28)

Class: 6A

What is your favourite fairy tale? Please create a new ending for the story in at least 100 words.

My favourite fairy tale is The Three Little Pigs.

In the end, the blood-thirsty wolf blew as hard as he could at the third little pig's brick house. He used up all his might. Gasping for breath, the brick house still stood formidable. The wolf was devastated, as though a blade pierced through his heart.

The wolf wandered back into the dark forest but he kept glaring back with his fearsome beady eyes. He couldn't believe his loss and defeat. The next moment, questions struck him like lightning bolts. 'Why did I fail?' 'How did they outsmart me?' 'How? How? How?' 'Because the house's structure ^{and materials} were too strong!' answered an elderly wolf with a howl. 'Structure?' the wolf asked with curiosity. ^{and materials}

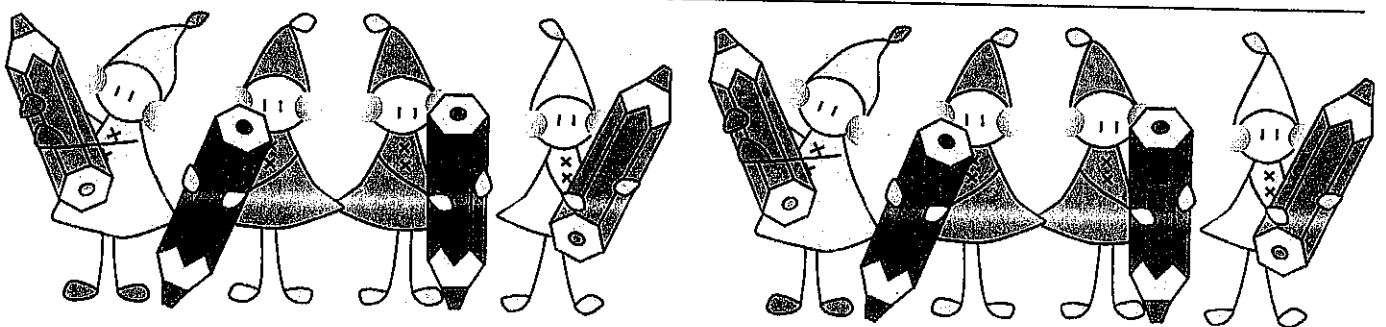

The wolf felt forevermore inspired. Soon, he became so invested in architecture that he decided to travel around the world to see for himself. He flew from country to country. Experienced harsh weather conditions, tremendous jet lag and language

barriers. Still, the wolf didn't give up, he was so determined. The moment he stepped onto the foreign land, the sight was worth everything. The Great Pyramid of Giza, built with blocks of rough sandstones that has withstood over 4600 years of time.

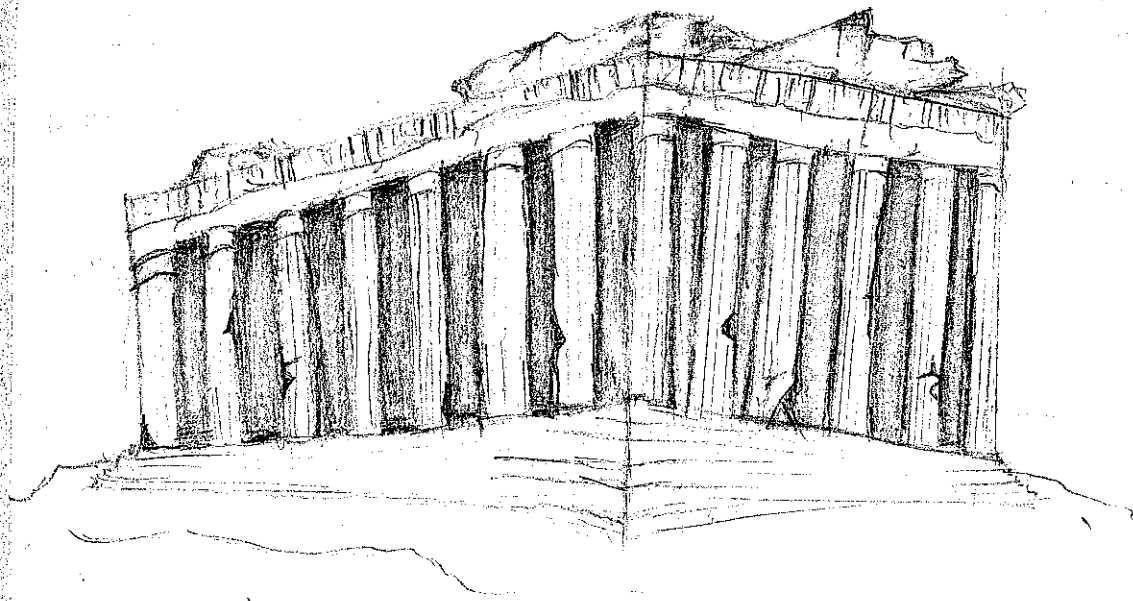

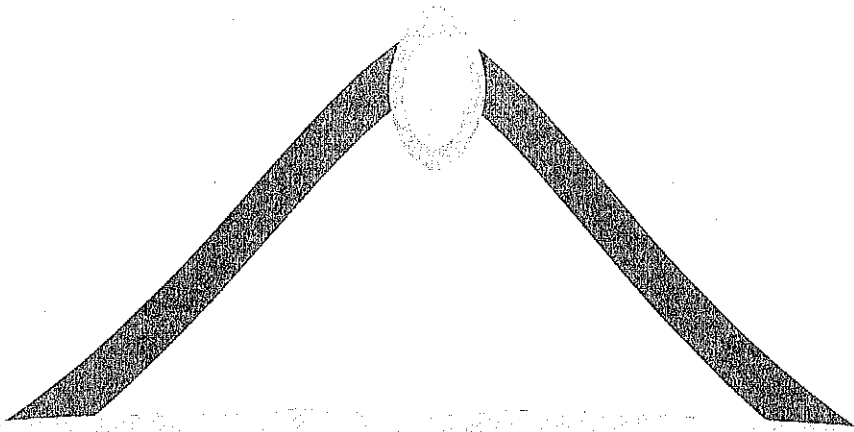

The Parthenon in Greek, created with magnificent rolls of columns that ancient Greek built. The St. Basil's Cathedral in Russia, blooming in colours with exquisite tented roofs and many more. He even studied with famous architects like Frank Gehry. ^{marvellous} architectures.

After years of time, the wolf traveled back to his homeland to contribute himself to the community. He built multiple green constructions for efficient and comfortable living spaces and to help the environment. The wolf poured every ounce of himself into the projects. His hard work really paid off.

On the second of January, the local villagers celebrate 'The Wolf Day' in honour of this selfless architect and to remind others to be determined and to chase their dreams.

You may draw a picture in the frame.

'The Parthenon in Greece, created with magnificent
rolls of columns that ancient Greek built.'
